

#	Page	Section/Reference	Question	Response
36.		Section B	Concerning CLINs 00003, 00011, 00019, 00027, and 00035: Is the government expecting bidders to put in a "Not to Exceed Number" in Optional Form 336 for these CLINs? If so, can we also assume that the NTE is to be based on the 3,000,000 documents stated?"	DOE does not expect the offeror to place a NTE value in the referenced CLINs. Offerors will be expected to place the appropriate dollar values in the subCLINs for those same CLINs. (i.e. subCLIN 00003AA - \$ _____ Per Completed and Accepted Data Input Record.)
37		General Question	Will DOE provide "Information that should be open government data such as DPLH and yearly budgeted dollars"?.	The Contract value & obligated amounts, as reflected in the basic contract/modifications, of the current contract will be posted to the following web-site by close of business May 06, 2009 under documents library: http://www.emcbc.doe.gov/Rocky_Flats/index.php
38.		General Question	Will DOE provide "the equivalency of the required labor with respect to the GS labor scale"?	DOE is unable to support this request because the RFP did not mandate "required labor" or any other type of labor categories (i.e. job classifications and skill levels). It is up to the Offeror to decide the best approach to provide the necessary services to perform the contract and include the approach in its proposal.
39.		Section L Attachment L.6	Will DOE provide "the government capital expenditures and scanning equipment operational costs" or the incumbent contractors scanning plan?	a. With regard to "government capital expenditures," the RFP provides all potential offerors with the government furnished equipment that is available for use on the anticipated contract in accordance with the applicable Federal Acquisition Regulations listed in the RFP. It is up to the Offeror to decide if utilizing this equipment is the best approach to provide the necessary services to perform the contract. b. With regard to "scanning equipment operational costs," the government furnished scanning equipment has not been utilized for operational scanning, therefore operational costs are not available. c. DOE will not be providing the incumbent contractor's scanning plan.
